GENERAL INFORMATION

This publication provides staff information for all credit programs offered in B.C. community colleges and provincial institutes, as well as class and enrolment information for all major program areas except vocational training.

All of the data in this report is for the 1988/89, 1987/88 and 1986/87 school or fiscal years. The tables and charts within this publication provide a variety of presentations of the data.

The data was obtained from the annual College Statistical reports and the PACS Actual Expenditure reports.

Data Limitations

The reader should note that certain data elements, such as "class size", are based on conventional lecture/classroom courses. For non-conventional instruction (eg. distance education) the concepts of class/section, class size, course hours and student contact hours are not applicable and, thus, are not included in the data presented.

It should also be noted that North Island College and the Open Learning Institute, have program delivery systems which differ from those of other colleges and institutes. This makes it difficult for these institutions to report using the existing data formats. As a result, the data for North Island College and the Open Learning Institute is not fully comparable to that of the other institutions.

Overview

The total number of staff increased significantly from 5,862 in 1987/88 to 6,707 in 1988/89. This 14.3 percent increase in the number of staff members was only partly echoed by a 7.3 percent increase in overall staff FTE (Tables 6 and 7). Table 1 also indicates that both part-time and full-time staff increased from 1987/88 to 1988/89. Part-time staff went from 2,438 to 3,249 while total full-time staff went from 3,346 to 3,401.

Tables 67 and 68 show that the number of course registrants in non-vocational courses increased 5.7 percent to 378,008 in 1988/89 from 357,733 in 1987/88.

Tables 61 and 62 show that the average class size has remained relatively constant between 1987/88 and 1988/89, only increasing 0.16 percent. In 1987/88 average class size was 24.81 while for 1988/89 it was 24.97. The increase in enrolments appear to have been largely offset by the increase in overall staff FTE.

During this same period the number of student contact hours (Tables 73 and 74) increased 3.2 percent from 22,607,479 to 23,340,824.

It should be noted that table totals are often less than the grand total of staff members as shown in Table 1. This is due to missing values, or values that do not fit with the pertinent data. For example, tables entitled "Full-Time and Part-Time" do not include staff on leave. As well, tables pertaining to gender do not include staff members whose gender was not reported.
